

The FxOnline main navigation menu is changing:

- The original navigation menu is moving higher up the screen but functions the same.
- The new **Product Bar** is being added below it.
- The **ID Bar** information is now on an orange background, and some of the data has been shortened to save space.

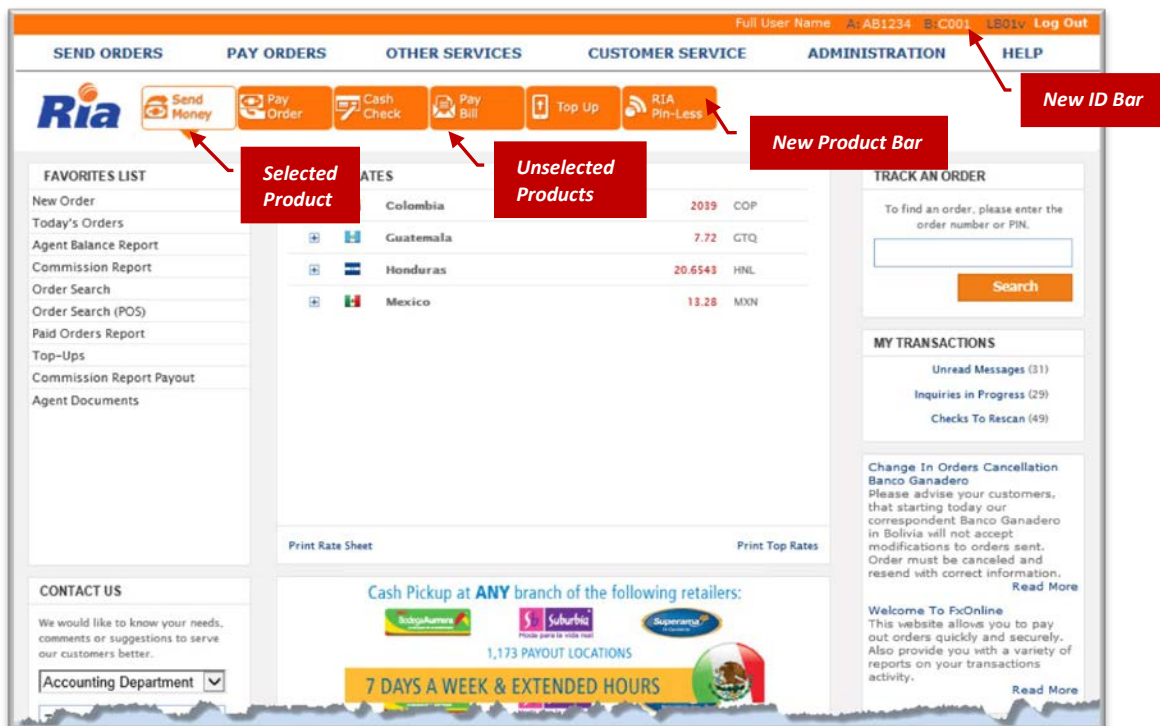

What the new Product Bar does:

- Permits you to jump to product screens with a single click.
- Saves you time over using the drop-down, rollover-submenus since only the buttons for the products you sell will display.

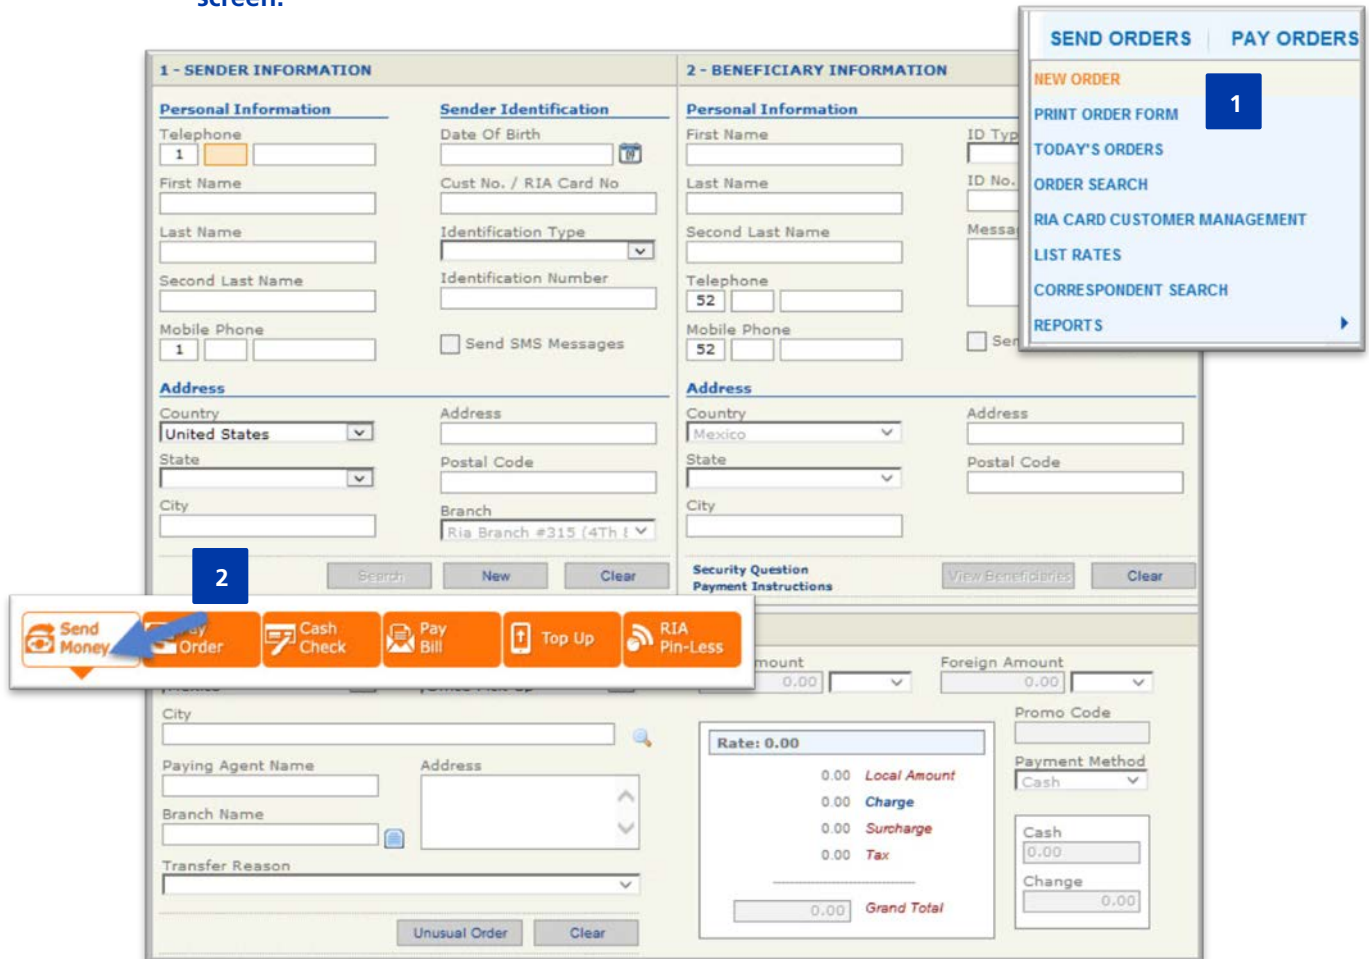

The buttons on the Product Bar appear in two ways:

- Selected – a white background with orange text
- Not Selected – an orange background with white text
- You can use the original menu or the new **Product Bar** until further notice.

- The following is an example of using the current menu and the **Product Bar** to navigate to the **Money Transfer** screen.

1. Clicking **Send Order, New Order** on the original menu brings you to the **Money Transfer** screen.

2. Clicking **Money Transfer** on the **Product Bar** brings you directly to the **Money Transfer** screen.

- This procedure works the same way for any product you sell.
 - ✓ You can use the original menu to navigate to the product screen, or
 - ✓ You can use the **Product Bar** to jump directly to the product screen.

Please take a moment to try out the new **Product Bar** and compare it to the menu.

If you have any questions, contact Web Support at the number shown below. You can also contact your Sales Representative or Area Manager.

This is the first in a series of FxOnline enhancements designed to make processing transactions faster and easier. You will always be provided with advanced notice detailing our system enhancements.
